

Exaton 15W

Exaton 15W est un flux de soudage basique pour le soudage l'arc sous flux offrant un bon piquage du laitier et un aspect fin au cordon de soudure. Sa basicité relativement élevée le rend adapté l'assemblage d'aciers inoxydables austénitiques et duplex lorsqu'une dureté de l'impact élevée est souhaitée. En raison de sa faible teneur en niobium, il peut être utilisé avantageusement avec des électrodes en fil stabilisés. Exaton 15W est un flux de soudage haute performance destiné de nombreuses applications d'assemblage dans les secteurs de la chimie, de la pétrochimie, du pétrole et du gaz. Il est particulièrement adapté la gamme Exaton d'électrodes en fil duplex (par exemple 22.8.3.L/25.10.4.L) en raison de son comportement hautement neutre qui garantit une microstructure équilibrée optimale. Grâce ses propriétés (qui ne se limitent pas au bon aspect du cordon de soudure et au laitier qui se détache tout seul), il peut également être utilisé en combinaison avec le fil NiCrMo-3 dans plusieurs autres applications (c'est-à-dire la fois pour l'assemblage et le recouvrement de soudure).

Caractéristiques

| | |
|--------------------|----------------------------------|
| Classements | EN ISO 14174 : S A AF 2 |
| Agréments | CE : EN 13479 UKCA : EN 13479 |

Les approbations sont basées sur l'emplacement de l'usine. Veuillez contacter ESAB pour plus d'informations.

| | |
|---------------------------|---|
| Courant de soudage | 1200 A (Using 60x0.5 mm strip) |
| Type de laitier | Fluoride basic CaF ₂ -Al ₂ O ₃ -SiO ₂ |
| Densité | nom: 1.0 Kg/l |
| Index d'alcalinité | nom: 1.9 |

Consommation de flux

| Volts | Volumme Flux/1 kg (2.2 lb) Wire DC+ |
|-------|-------------------------------------|
