

## OK Autrod 312

A continuous solid corrosion resisting chromium-nickel wire for welding of stainless steels of the 29% Cr, 9% Ni types. OK Autrod 312 has a good oxidation resistance at high temperatures due to its high content of Cr. The alloy is widely used for joining dissimilar steels especially if one of the components is fully austenitic and steels that are difficult to weld, i.e. machine components, tools, austenitic manganese steels.
